

How To Set Up the WorkCentre 77xx for EIP

Prerequisites:

- The WorkCentre must have the latest firmware installed. You can download the firmware from the Xerox website.
- The Device must be EIP-capable.

Settings for the WorkCentre 7700 Series

You use the CentreWare Internet Service interface to the MFP to configure the device settings.

CentreWare – in website set <http://ip-mfp> (example <http://192.168.0.61>)

When accessing the CentreWare Internet Services, a login page may display prompting for a username and password. If you do not know the password, contact your administrator. The default password is 1111. If the administrator encounters a problem changing the password, or forgets the password, a service call must be placed.

1. Configure **Machine Digital Certificate** by doing the following:
 - a. Click on the **Index** link located in the upper-right hand corner of the page.
 - b. Click the **Extensible Service Setup** Link.
